SAMPLE WEBSITES BY [CYBERPUNKMANIA AGENCIES](#)

Hello,

For a standard five-page website, my pricing starts at **7,000 KES**, which can be adjusted based on the client's specific requirements and any additional integrations they may need.

- **Logo Design**: If the client needs a logo, I charge **1,000 KES** for a standard design. If the client provides their own logo, no additional charges will apply.

- **Hosting**: The client will cover the hosting costs. I will recommend the most suitable hosting specifications for the website, ensuring transparency by sharing the hosting fees and links. I also assist in setting up the hosting account and provide the client with all account details.

- **Domain Name**: The client will also need to purchase the domain name. I will advise on the most suitable domain extension based on the website's purpose.

- **SEO**: I offer a standard SEO service, including Google listing. Additional SEO optimizations can be arranged at an extra cost, as they often require paid tools. I provide a detailed breakdown of these services upon request.

- **Maintenance**: After development, I provide **2 months of free maintenance** for all new clients and **6 months of free maintenance** for returning clients.

- **Mobile Applications**: I also develop mobile applications, with pricing starting from **10,000 KES**, depending on the specifications and features required.

All prices are negotiable based on the project scope and client requirements.

Here are some of the websites I've developed:

- [Ramrod Ujuzi](#)
- [Hello Tractor](#)
- [My Trove](#)
- [Atlancis](#)
- [iLearn](#)
- [Servernah](#)
- [HalloPay](#)
- [HSC](#)
- [Includovate](#)
- [The Art Space](#)
- [Canvas Guy](#)
- [ECB Tech Kenya](#)
- [New Frontier](#)

In addition to websites, I have built fully-fledged applications and ERP systems, which I cannot showcase here due to security and confidentiality reasons.
